

FORENSIC
ACCOUNTING SERVICES

Litigation support

Overview

With over 40 specialist forensic accountants across Australia, Sedgwick's forensic accounting services division has extensive experience in providing a broad range of independent financial analysis and forensic accounting services to legal professionals.

Our key litigation service lines are highlighted below:

Economic loss and damages

Quantification of complex losses across numerous industries and actions, with specific expertise in the following areas:

- Contractual disputes
- Construction
- Personal injury
- Product recall and liability

Warranty and indemnity

Review and quantification of damages due to breach of warranties or indemnities, drawing on our expertise in business valuations and assessment of economic loss.

Subrogation and recovery

Unique industry expertise to review business interruption insurance settlements and assess losses in the context of common law claims.

Class actions

Industry-leading technology solutions and experience in some of Australia's largest class action economic loss, sampling and settlement administration matters drives an entirely unique value proposition for class actions.

Presentation of findings

Tailored, high-level calculations through to detailed expert reports and presentation of evidence as Expert Witness in Court.

Business valuations

Experienced specialists provide comprehensive, accurate and independent expert business valuations for family law, shareholder or other disputes.
