

Aviation claims solutions

Whether it is a claim that involves damage to an aircraft's hull or a repair-related liability issue, working with an experienced claims team with in-depth knowledge of the aviation industry is essential. Finding the right resources can be a challenge. Sedgwick can help. Our aviation experts provide adjusting and surveying services for aviation businesses around the world.

Expert claims services and support

Our team offers valuable technical expertise based on many years of practical experience in the aviation and insurance industries. Our claims services include:

- Hull and liability surveying and adjusting
- Claims management and investigation
- Aircraft recovery and salvage disposal
- Subrogation
- Litigation management
- Operational surveys and safety audits
- Expert witness testimony

Detailed inspections

When an aircraft is damaged, completing the survey to assess damage requires a deep understanding of the aircraft's or engine's construction, maintenance and repair processes.

Sedgwick's hull surveyors assist with the most complex inspections and coordinate with all relevant parties. With our global presence, we can arrange for a surveyor to

be on site, almost anywhere in the world, within a few hours of notification.

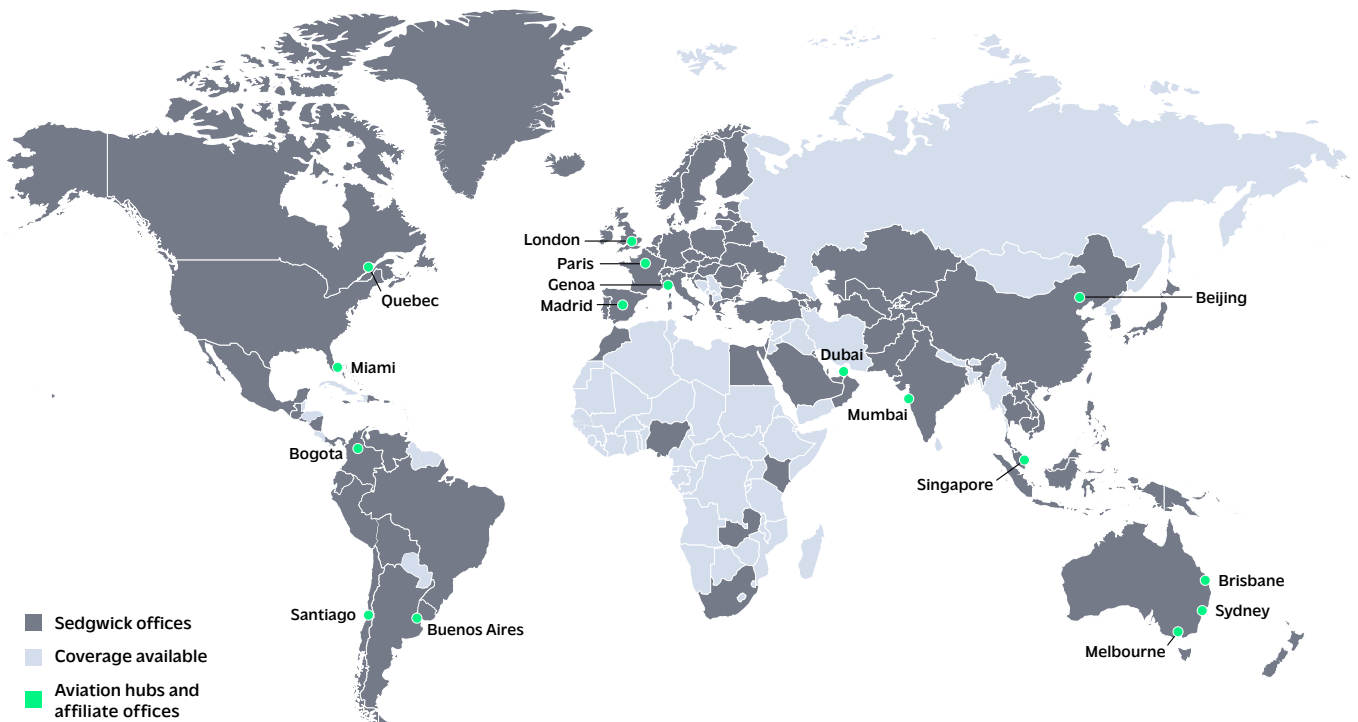

Our investigations of first-party claims include comprehensive reports with detailed descriptions of damage, recovery and repair options, cost estimates/evaluations and recommendations.

Expert claims handling within all aviation sectors and related industries, including:

- Commercial airlines
- Airport operators
- Cargo operators
- Corporate aviation
- Flight schools
- Original equipment manufacturers (OEMs)
- General aviation
- Ground handling services
- Military and law enforcement
- Regional carriers
- Air taxi operators
- Maintenance-repair-overhaul (MRO) service providers

Aviation hubs and affiliate offices

Supported by Sedgwick colleagues throughout the world

Enhancing the claims process

Sedgwick's aviation team has unparalleled technical expertise and experience assisting clients with aircraft damage and liability claims. Our experts have handled many of the world's highest-profile accidents and incidents over the past three decades, which often involved very complex recoveries and/or hull repairs. Through these assignments, we have worked with all the major manufacturers and specialist repair organizations.

In addition to investigating and adjusting claims, we handle direct recoveries against a third party, assist with subrogation and provide litigation management services and expert witness testimony. Sedgwick also offers a full suite of support services, including forensic engineering, fire investigation and brand protection, to address specific claims-related issues.
