

Auto direct repair program

Ready to join the fastest growing network of auto direct repair facilities in the nation? As the premier supplier of managed auto direct repair programs (DRP), we offer outstanding customer service, extensive industry experience and opportunities to gain new customers across the country.

Delivering valuable benefits

- When an auto shop joins our proprietary DRP network, they gain immediate access to a new and always evolving customer base
- Shared technology helps streamline the repair process and reduce cycle time

Focusing on quality

We are committed to building strong partnerships with auto shops nationwide. Our knowledgeable team can build automation into the referral process to enhance the experience and our one-of-a-kind mobile app helps repair facilities provide real-time updates to customers. Joining the auto direct repair program means you can rest easy knowing you and your customers are taken care of.

A seamless process

After completing the registration form, a network manager reviews the auto shop to ensure they meet the criteria for the network. Our goal is to provide customers with access to high-quality auto shops they can trust. By accepting a limited number of repair facilities into the network, we can ensure proper coverage and volume potential for every auto shop.

Joining our DRP network can mean active referrals and a steady stream of customers – overall, an increase in repair volume potential for your shop.

Driving results

- With two dedicated auto centers, assistance is always there if and when you need it.
- We have a growth mindset, serving more than 100 auto clients with one million auto claims — and we're just getting started.
