

PPO network: best coverage, best savings

Our vast network offers access to nationwide coverage, and customizable options focused on treating workplace injuries.

Our PPO offering includes our proprietary national provider network and regional and national network partners, offering access to over 900,000 medical professionals across all specialties. This also includes state-level custom PPO mosaics that we implement to support clients and drive the best access to care and savings. They understand the complexities of workplace accidents including the value of early intervention, state and national treatment guidelines, and the importance of helping injured employees return to work.

And because we manage billions of dollars in medical cost annually, we can negotiate competitive rates with our network providers and partners – which drives more savings to you.

The right provider is just a click away

Our online easy-to-use provider search tool helps our employers and their injured workers find the best – and closest – care, determining their location via address and ZIP code; there are also lookup options by provider name and specialty. We can create provider panels for each employer location to simplify your injured workers' provider search process and support your efforts to give employees access to the most convenient and appropriate care.

Custom and state certified network solutions

We have experience creating customized and state certified networks, and we work with clients to develop solutions to meet their needs, whether they are related to specialties, regulatory concerns, or geographical challenges. Sedgwick supports outcomes-based state-level options across the country, including California MPN, Texas HCN/504 and Illinois PPP.

Full administrative support and service

Navigating the workers' compensation process can be daunting, so our dedicated client services team is available to assist you and your employees. If an injured worker needs help finding a qualified

provider in their geographic area or needs a hard to find specialist, our client services team is here to help.

When questions arise about payments, our team can communicate with providers to help unravel complex issues with paperwork, treatment plans, negotiated rates and other issues.

Measuring our value

Our experience in building and maintaining a national network of providers for the workers' compensation market means our customers get to the right provider at the right time and pay the right fees. Our PPO network helps our clients return their injured employees back to health and productivity at the lowest overall cost.

Solutions to fit your needs

When workplace injuries or illnesses occur, we are here to help. We offer flexible services that streamline the managed care process and make your job easier. By providing the right care and coordination solutions – from clinical case management to networks and support – along with the best treatment and cost oversight, we're driving better outcomes for your employees. And that means better outcomes for you.
