Analytics reports

Throughout a project, it is extremely important to stay up to date on the progress. Being able to instantly view ratios, charts, totals, summaries and other reports helps keep projects moving in the right direction.

The challenge

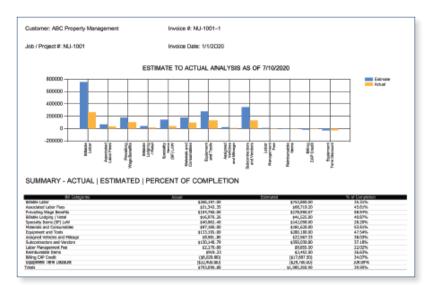

Finding the time to pull data and calculate certain analytics can be nearly impossible. However, tracking and reporting on certain project analytics is crucial to the success of the project.

The solution

T&M Pro automatically creates multiple reports and analytical summaries based on project information in the system. The project data is automatically generated, saving time and reducing stress. Having instant access to estimate to actual variances, daily labor totals, daily burn rates and the items billed summary will help you stay up to date and keep projects on track. The analytics reports include:

r<u>⊙-suite</u>

- Estimate to actual variances offering a live view of the percentage of completion for each billable category
- Daily labor totals with an instant snapshot of the number of laborers, total hours billed and total billing value
- Daily burn rates showing an overview of the dollar value for each billable category every day of the project
- Items billed summary with options to see individual categories, line items, and exact quantities, days and hours billed

TOTAL LABOR AND HOURS BILLED PER DAY - LABOR DAILY BURN RATE

Data	Total Labors Billed	Total Billing Hours	Total Billing Value Fer Day
7/25/2819	17	284	\$13,821.70
