

Energy claims solutions

To meet the world's ever-increasing demand for energy, new power-generation methods are being developed. The need for consistency in our current systems has never been more imperative. Sedgwick has the specialized expertise necessary to manage and expedite all aspects of the complex claims that occur in this industry.

Managing power generation property losses

Energy claims can involve:

- A diverse range of complicated equipment infrastructures
- Machinery that is expensive to acquire and operate
- Extensive lead times for equipment repairs and/or replacements
- Significant business interruption implications

Many of the claims we handle are technically complex and require adjusters who are skilled in engineering and industrial claims assessments. Our dedicated energy team can assist with claims at all levels of production including upstream, midstream and downstream. They also understand the complexities associated with the mining/raw material extraction industry.

Industry expertise

Our experts have handled a significant number of claims for independent power producers, involving specialized equipment and a wide variety of sources. These methods of generation include renewables, such as:

- Solar
- Wind
- Ethanol
- Hydroelectric
- Natural gas
- Geothermal
- Tidal and wave
- Biomass/biofuels

With more than 200 years of combined experience in this uniquely specialized field, Sedgwick's energy team understands both the fundamentals and intricacies of the power generation industry.
