

Logistics claims

LOGISTICS CLAIMS

When incidents occur, logistics service providers are faced with an array of issues; multiple parties are involved, claims can be substantial and there are often legal issues.

The claims can happen at a variety of different points in the process; transportation, storage and forwarding.

Dealing with these claims requires not just an understanding of the standard contractual arrangements but needs people with experience dealing with enhanced agreements between parties and the arising liabilities. Sedgwick's team has that experience to untangle these complex claims, determine responsibility and establish.

Our experts ensure the interests of all parties are considered. The experts in our Logistics claims team have a legal background and extensive experience in the sector.

In the Netherlands our dedicated logistics claims experts are available in both our Amstelveen and Rotterdam offices.

SEDGWICK

Sedgwick is one of the largest claims management companies in the world. Our client relationships have stood the test of time. We focus on delivering the right level of expertise all over the world.

GLOBAL NETWORK

Sedgwick offers a global network of marine surveyors and adjusters.
