

# Sedgwick MCO and 888-OhioComp performance comparison

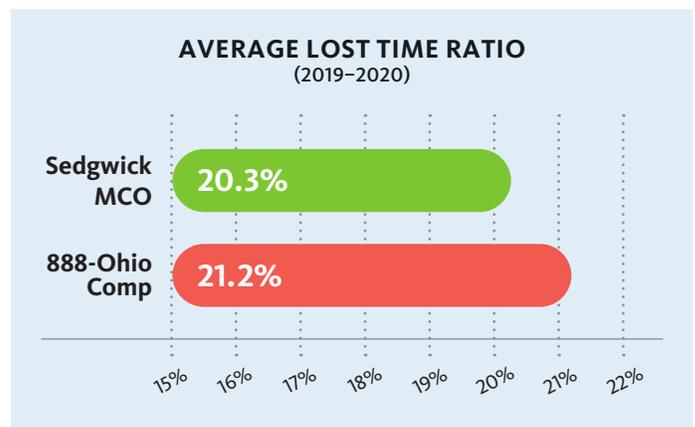

Sedgwick MCO is Ohio's largest managed care organization and we handle more than half of all workers' compensation claims in the state.<sup>1</sup> We have extensive experience guiding Ohio employers and injured employees through the managed care process.

Lost days are the most significant cost driver in workers' compensation claims, and one of the best predictors of claim costs and premium impact. A managed care organization that consistently facilitates a faster return to work for injured employees positions their clients for success. From 2019-2020, Sedgwick MCO averaged 21.1% fewer lost workdays per claim than 888-OhioComp.<sup>1</sup>

Sedgwick MCO is the most selected managed care organization among Ohio state-funded employers, with far more clients in every industry classification than any other managed care organization.<sup>1</sup> The depth of resources and expertise that we provide employers and injured workers contributes to our results.

Early and aggressive medical management can help minimize each claim's chances of extending into lost time status (eight or more calendar days) and driving up premium costs. Sedgwick MCO outperformed 888-OhioComp in the ratio of claims that become lost time and incur additional indemnity and reserve costs.<sup>1</sup>
