

Sedgwick MCO and 3-hab performance comparison

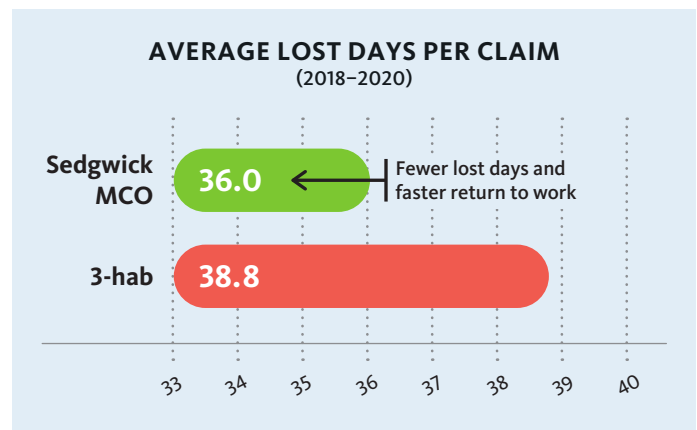

Sedgwick MCO is Ohio's largest managed care organization and we handle more than half of all workers' compensation claims in the state.¹ We have extensive experience guiding Ohio employers and injured employees through the managed care process.

Medical expenses can greatly increase workers' compensation claim costs. Limiting lost workdays and scrutinizing average medical treatment plans helps control the impact on employers. Comparing average medical costs for active lost time claims, Sedgwick MCO outperformed 3-hab by 7.7%.¹

Preventing lost time claims is an important goal, but getting the back to work is still a priority after a claim becomes lost time. Putting a stop to compensation and reducing reserve costs depends heavily on controlling lost days. Sedgwick MCO outperformed 3-hab in average lost days per lost time claim by 13%.¹

Lost days are the most significant cost driver in workers' compensation claims, and one of the best predictors of claim costs and premium impact. A managed care organization that consistently facilitates a faster return to work for injured employees positions their clients for success. Sedgwick MCO averaged 7.7% less lost workdays per claim than 3-hab.¹
