

Pre-opening site inspection services

To ensure buildings and facilities are in occupancy-ready condition as employees return to work, Sedgwick can provide site safety inspections prior to reopening.

Our team will complete a thorough review of the site's interior and exterior, fire safety and emergency equipment, electrical safety and overall housekeeping. Our safety inspections are provided by experts with the training and experience to inspect commercial and residential projects.

We use a comprehensive site safety checklist that covers the following areas:

- Fire safety and emergency equipment
- Emergency preparedness
- Housekeeping/walking and working surfaces
- General – Building exterior and grounds
- Electrical safety
- Special hazards
- General observations

Once the checklist is completed, an inspection report will be provided along with any necessary recommendations. If cleaning or restoration services are needed, our repair solutions concierge can assign an appropriate contractor assist you.

Preventative risk control services

Sedgwick offers a full range of risk control solutions that address key areas to help businesses lower their exposure and reduce the cost of risk. We provide local, personalized services including:

- Risk assessments for all industries and all lines of coverage; options include physical, virtual or telephonic
- Loss control consulting covering key areas such as service plans, safety program development and implementation, OSHA compliance, safety training and virtual safety services
- Premium audit services for voluntary or e-audits; options include physical, virtual or telephonic

With the broadest array of risk control services available in the marketplace today, Sedgwick helps clients control their risks and achieve key business objectives.
