

Structural, civil engineers Davis Patrikios Criswell join EFI Global

Leader in commercial structural and civil design, forensic investigation and construction management to support company's U.S. operations

TAMPA, Fla., Dec. 5, 2022 – [EFI Global](#), a leading full-service international consulting firm specializing in forensic engineering, environmental, fire investigation and specialty consulting services, announced today that structural and civil engineering design services firm Davis Patrikios Criswell (DPC) has joined its operations. Co-founding principals Marshal Davis, Gerry Patrikios and Eric Criswell and their team are set to bring their more than 75 years' combined experience and unique approach to structural design and investigation to the company's daily operations.

As part of EFI Global, the team from DPC will provide specialized services that include inspections of existing projects and recommending safe, reliable and environmentally responsible methods of repairing and replacing defective elements in structure rebuilds. Their multisector expertise bolsters EFI Global's repair design services within its commercial portfolio, allowing the company to continue responding to virtually any type of failure — regardless of structure type or location. The team joining EFI Global from DPC will support the launch of an engineering design offering for new and current clients.

"In addition to extensive experience, the team at DPC bring a unique perspective on complex failure-related losses that will enhance the solutions available to our clients," said Matthew Rodda, vice president, western region for EFI Global. "Their respected record of building evaluation, site work and sound knowledge of materials and industry standards will add immense value to our line of forensic engineering, scientific and failure analysis services."

Headquartered in Memphis, Tennessee, DPC provides structural and civil engineering design services to commercial property developers, owners and architects, with a focus on public safety and economical design. Recent projects include full-service and boutique hotels, luxury resorts, multifamily residential complexes, educational facilities, retail shopping centers, mixed-use lifestyle centers, medical spaces, industrial facilities and commercial centers covering a large footprint of the United States.

EFI Global offers the widest range of engineering, fire investigation, environmental, failure analysis, accident reconstruction and laboratory testing services available in one company to the public and private sectors worldwide.

About EFI Global

EFI Global, part of Sedgwick, is a well-established brand with an excellent reputation in the Americas, Africa, Asia-Pacific and Europe as a market leader in environmental consulting, engineering failure analysis and origin-and-cause investigations. Each year, EFI Global completes more than 45,000 projects worldwide for a wide range of clients, such as commercial, industrial, institutional, insurance, government, risk managers, public and private entities. EFI Global is one of the world's most respected emergency response firms, capable of providing practical solutions to the most complex problems. Our multidisciplinary team of first responders, project managers, engineers, geologists and scientists are selected for their technical proficiency and in-depth industry knowledge to aid clients in resolving technical problems.
