

Pool administration

More than 4,000 public entities trust us to manage their pools. Roadmapping is key, and we help ensure your pool has a clear direction through annual goals, timelines, budgets and other initiatives.

Solutions to meet your needs

From coverage design to meeting facilitation, Sedgwick manages everyday administration – so your members can focus on serving the public. And as your risk management partner, we stay one step ahead of trends, opportunities and potential risks in order to better understand, identify and address your pool's exposures.

We will help you design a pooling administration solution that best fits the specific needs of your pool and its membership.

Our services include:

- Program administration
- Board governance training, strategic planning and serving as a liaison to the board of directors
- Financial management and pool accounting including analytics, budgeting and surplus strategy
- Underwriting, coverage analysis, reinsurance consultation and program design
- Litigation and claims management
- Risk control services including training, site inspections, accident investigations, safety program development, ergonomic assessments, temporary safety control officers and online resources
- Cyber risk services to help pool members evaluate their cyber exposures and prevent losses

In addition, Sedgwick has developed, implemented and maintains a proprietary underwriting and pool management software designed to facilitate policy issuance and data-driven decisions.

Risk management expertise

Our pooling team has more than 30 years of experience providing self-insured pool management and claims administration services. Our experts include senior claims specialists focused on complex public entity claims, attorneys to help manage litigated claims, and experienced colleagues to assist with underwriting, program structure, benchmarking, surplus management, risk control, meeting facilitation and strategic planning.

Our dedicated team works collaboratively to provide clients with access to their collective knowledge base.
