

Environmental claims solutions

Environmental damage can disrupt businesses, damage reputations, have serious financial consequences and require lengthy remediation. Sedgwick has a network of environmental specialists around the globe ready to respond to the most challenging claims and provide guidance from day one.

We are here to help

Below are some examples of the types of environmental and pollution-related claims our team assists with and the services we provide.

- Remediation cost control
- Audit of invoices from private contractors and public agencies
- Contaminated groundwater claim activities
- Hazardous materials cleanup and disposal monitoring
- Oil field/energy related losses
- Transportation of petroleum and chemical products
- Underground and above-ground storage tank releases
- Superfund activities
- Document retrieval and review from federal, state and local environmental agencies
- Toxic tort
- Trucking and aviation spills

Services and support for emergency spills

We also have expertise handling various types of emergency spill losses. Our services include:

- Locating hazardous material contractors to respond
- Monitoring costs in each phase of the project — cleanup to disposal
- Communicating with and monitoring all federal, state and local agencies involved, as well as assisting with any environmental agency reporting requirements
- Ensuring the disposal of waste is being properly documented, keeping long-term liability in mind
- Auditing all contractor invoices
- Auditing invoices received from local agencies, such as fire departments, state environmental units, etc.
- Securing and reviewing all supporting documentation (waste manifests, laboratory analysis, etc.) for our clients' permanent files
