

Forensic accounting services

To ensure claims are accurately quantified and resolved, many complex financial components must be analyzed. Our forensic accounting team provides the skills and expertise to help clients achieve the best results when resolving claims and disputes.

Expert solutions

We provide forensic accounting and other claim-related services for carriers, adjusters, attorneys and others.

Our accountants have in-depth experience in the following financial areas:

- Measurement of economic damages
- Appropriate calculations of co-insurance, waiting period deductibles and other conditions
- Elimination of duplicate payments
- Determination of alternative means to measure losses when traditional documentation is unavailable
- Measurement of losses that cannot be physically observed
- Working with insureds to mitigate time element losses

The breadth of our services encompasses every major industry segment and claim type. Our expert team specializes in key areas including:

- | | |
|--|------------------------------|
| • Time element analysis | • Data analytics |
| • Employee dishonesty | • Theft |
| • Inventory and stock analysis | • Loss of rent |
| • Extra expense calculation | • Builder's risk |
| • Product recall and product liability | • Scheduling property damage |

Specialized capabilities

When businesses are dealing with losses due to a catastrophic event, the impact must be measured locally, as various regions and industries can be affected differently. Our team can isolate the effect on the business from the overall impact and objectively measure the losses. Using data analytics and technology, our team can rapidly respond to increased claim volumes as needed.

The Sedgwick difference

We combine the personal touch of a small firm with the resources and reach of a global company. Our goal is to accurately measure the financial impact of an event on your business, while providing consistent, high-quality service.
