

# Energy

## Global solution. Local expertise.

*All over the world, electrical systems are moving towards new energy generation technologies that are more sustainable and spread out, forcing infrastructure and regulation changes. With a changing sector, we face a large variety of accidents, which require quick and close management by experts experienced in different fields, keeping local legislation and regulation in mind.*

### Generation

Machine breakdown and material damage to generation facility, both conventional thermal power plants and renewable energy facilities.

### Transportation and distribution

Material damage and breakdowns to substations and transportation and distribution of electrical lines.

### Profit losses

Calculation of related profit losses resulting from losses at energy generation or distribution facilities adapted for the regulation in force in the territory in question.

### Power outages

Mass claims adjustment resulting from electrical power outages in the region.

## Leading global provider of technology-enabled risk, benefits and integrated business solutions

Sedgwick is one of the world's largest global providers of claims management solutions and loss adjusting services. We strive to remove complexity from the process and offer a service with a unique combination of stability, innovation and technical capacity in a wide range of business lines.

### One point of contact

A common element of all the claims that we've successfully handled is that good communication is critical across all parties this is why we provide a single contact point supplying regular updates regarding the claim.

## Response capacity

Sedgwick is a leading global provider of loss adjusting and claims management solutions. That is why, with the help of local experts, we can respond quickly to the needs of our customers, anywhere in the world.

### Digital Strategy

The ability to deploy technology is a vital component in adjusting today's losses - whether it's drone technology to get early sight of damages at inaccessible sites or video and online reporting to assist our clients in undertaking quicker and more accurate loss assessments. There's no doubt that the power of people is enhanced by the smart use of machines.
