

# Construction

## Global solutions. Local expertise.

*We've faced the challenges stemming from the most serious and complex losses related to all types of civil and building works. Our technical team comes from the construction sector, contributing this experience to the insurance market. The technical skills of our loss adjusters and their knowledge on the insurance field guarantee a thorough cause investigation and a correct claims adjusting.*

### CAR (Construction All-Risk Policies)

Civil Works and Building Expert Reports under Construction All-Risk Policies: highways, railroads, ports, singular buildings.

### Construction liability

Cause investigation and determination of liability under liability construction policies: public, professional, product and employers liability.

### ALOP/DSU

Timeline study and adjustment of the project preview to determine the scope of delays that enable coverage for expected loss of profits.

### Pathologies

We conduct risk and protocol inspections for cracks in urban infrastructure works. We have experts on building pathology.

### CAT/Consortium

We actively take part with the Insurance Compensation Consortium in the special risk accidents throughout Spain.

## Leading global provider of technology-enabled risk, benefits and integrated business solutions

Sedgwick is one of the world's largest global providers of claims management solutions and loss adjusting services. We strive to remove complexity from the process and offer a service with a unique combination of stability, innovation and technical capacity in a wide range of business lines.

### One point of contact

A common element of all the claims that we've successfully handled is that good communication is critical across all parties this is why we provide a single contact point supplying regular updates regarding the claim.

## Response capacity

Sedgwick is a leading global provider of loss adjusting and claims management solutions. That is why, with the help of local experts, we can respond quickly to the needs of our customers, anywhere in the world.

### Digital Strategy

The ability to deploy technology is a vital component in adjusting today's losses - whether it's drone technology to get early sight of damages at inaccessible sites or video and online reporting to assist our clients in undertaking quicker and more accurate loss assessments. There's no doubt that the power of people is enhanced by the smart use of machines.
